## EDUCATION

**Shri Govindram Seksaria Institute of Technology and Science**  
B.Tech in Electronics and Telecommunication

Indore, MP  
2023–2027

## RELEVANT COURSEWORK

- Data Structures & Algorithms
- Algorithm Design & Analysis
- Object-Oriented Programming
- Operating Systems
- Computer Networks
- Database Management Systems (DBMS)
- Web Engineering

## WORK EXPERIENCE

**InDhanPay Pvt. Ltd. (Intern), Indore**

May 2025 – Dec 2025

Backend Developer / Node.js, Express.js, PostgreSQL, Knex.js, Git, GitHub, AWS SNS, AWS S3

- Led the design and development of a real-time role-based notification system using AWS SNS and Firebase Cloud Messaging (FCM), ensuring scalability, modularity, and maintainability.
- Developed and optimized RESTful APIs using Node.js and Express.js, reducing latency by up to 80% and improving system performance.
- Refactored and optimized complex PostgreSQL queries, achieving 30–50% faster response times and enhanced database efficiency.
- Created and maintained API documentation using Swagger (OpenAPI), improving developer experience, cross-team collaboration, and onboarding speed.
- Integrated AWS S3 for secure file storage, implementing image compression and file optimization techniques to reduce storage costs.
- Applied software engineering best practices, including system design, performance tuning, and code optimization to improve reliability and maintainability.

## PROJECTS

**n8n Exchange** – Automated Cryptocurrency Trading Platform / MERN + WebSockets

GitHub

- Built a full-stack automated trading platform (React.js, Node.js/Express, MongoDB) with a drag-and-drop workflow builder enabling real-time, node-based strategy execution.
- Architected scalable, secure backend systems using RESTful APIs and Firebase Authentication, ensuring data consistency during concurrent executions and supporting 7+ automated trading triggers.
- Engineered low-latency trading infrastructure with real-time market data (CoinMarketCap API, Socket.io), alongside a complete portfolio management system with analytics and historical price tracking.

**ResumeSync** – AI-Powered ATS Resume Matcher / MERN Stack + Groq AI

GitHub | Live Link

- Developed a full-stack ATS resume matching platform using React 19, Node.js/Express, MongoDB, and Groq-assisted feedback with a custom weighted scoring model.
- Built secure authentication flows with JWT, Google OAuth 2.0, and OTP-based password recovery.
- Implemented efficient file processing, keyword extraction, automated cleanup of uploaded files, and dynamic PDF report generation for analysis results.

## TECHNICAL SKILLS

**Languages:** C++, Java, JavaScript, TypeScript, SQL

**Frameworks/Technologies:** HTML, CSS, TailwindCSS, ReactJS, Node.js, Express.js, EJS.

**Developer Tools:** VS Code, IntelliJ IDEA, Postman, Git, GitHub, MySQL, PgAdmin, Swagger and OpenAPI

**Databases:** MongoDB, PostgreSQL, Redis

**DevOps Tools:** Docker, AWS SNS, AWS S3, Firebase Cloud Messaging (FCM)
